

DISASTER REMEDIATION

A better solution to mold, fire, smoke and water remediation projects

KEY BENEFITS

- REDUCED REMEDIATION TIME
-
- NO SECONDARY WASTE
-
- NON-ABRASIVE
-
- ABILITY TO DEODORIZE AFFECTED AREAS
-
- CHEMICAL FREE PROCESS
-
- ELIMINATE MANUAL CLEANING
-
- ENVIRONMENTALLY FRIENDLY
-
- 99% MOLD SPORE REMOVAL ON WOOD
-
- DRY CLEANING PROCESS

Dry ice blasting has been proven to be a faster and more effective solution in remediation efforts. The process eliminates manual cleaning and does not produce secondary waste, which reduces the amount of time spent on encapsulation and waste collection and disposal.

Dry ice blasting can access and clean hard to reach areas, such as the tight angles of trusses, around nails, wiring and all plumbing without damage to the surface integrity. The process also eliminates or significantly reduces odor created by fire, smoke and mold damage.

"Cold Jet's equipment is bar none the best cleaning quality we can achieve. Coatings and deodorizers are used at a minimum because it eliminated 100% of the charred wood and carbon which houses the smell."
