

RUBBER

Keep the lines running with mold cleaning made easy

KEY BENEFITS

ELIMINATE COMPLETE SHUTDOWNS

CLEAN IN-PLACE - NO MOLD DISASSEMBLY

IMPROVE PRODUCT QUALITY

REDUCE SCRAP RATES

INCREASE PRODUCTION TIME

NON-ABRASIVE - NO IMPACT DAMAGE OR MOLD EROSION

REDUCE CLEANING TIME AND LABOR COSTS

NO SECONDARY WASTE

ENVIRONMENTALLY FRIENDLY

Buildup of cured material and mold release agents causes sticking molds, blemishes and unwanted flash on final parts, making them unusable and requiring press shutdown for cleaning. Traditional cleaning methods can be time consuming, ineffective, damaging to molds and result in high labor and material costs.

Dry ice blasting is an in-place, online or offline, quick and effective way to clean without damaging expensive molds.

"We clean a number of molds that are hot while onlin. With dry ice cleaning, we are able to clean the molds much faster than when using chemicals. This has reduced downtime and increased both our productivity and employee safety."

Industry Leaders Benefiting from Cold Jet

FEATURED APPLICATIONS

INJECTION MOLDS
BLOW MOLDS
COMPRESSION MOLDS

SILICONE RUBBER INJECTION MOLDS
METAL BONDED MOLDS

LIFT PRESSES
TILT BACK PRESSES
